

THE WELCOME HOME GOLD MINING

ALD, FRIDAY, JUNE 7, 18

P R O S P E C T U S
of the
ROSEWOOD COPPER MINING COMPANY
(Limited).

Capital, £30,000, in 30,000 shares of £1 each,
16,000 of which are proprietors' non-contributing shares,
and the remaining 14,000 shares are now offered to the
public on the following terms:

2s 6d per share deposit on application, 2s 6d on allotment,
and the balance as required by the directors, to call
not exceeding 2s 6d per share, at intervals of three
months. With a clause in the deed of settlement by
which shareholders can withdraw after payment of the
first £5 per share, if they so desire.

DIVIDENDS WILL BE PAID ON ALL SHARES ALIKE.

DIRECTORS:
 G. Allen Mansfield, Esq.,
 William Bullard, Esq.,
 Joseph Wearne, Esq., M.P.,
 R. Grant Howland, Esq.,
 The Hon. George W. Lloyd, M.P.

BANKERS:
 The Bank of New South Wales,
 Messrs. Allen, Howland, and Allen

PROVISIONAL SECRETARY:
 W. H. Barnburgh, 303, George street, Sydney.

This Company is formed for the purpose of working the Rosewood Copper Mine. The property consists of 190 acres of mineral land, secured, and capped by the Crown Lands Alienation Act of 1868, and is situated at five miles about fifty miles from Rockhampton, twenty-five miles from the coast, and the present roads are traversed by the Westwood Railway.

This mine was discovered in May, 1869, and sufficiently proved to be a valuable mine; but as mining operations were not then very attractive, and copper was at the time, the necessary capital could not be obtained to work it. Captain A. R. B. Osborne, who has since so successfully worked the Mount Perry mine, thought so highly of it, when the works were suspended, that he addressed the letter appended to the prospectors.

The capital then required was advanced at 1000 per cent, and gave the following results:—47·62 per cent, 94·90 per cent, 42·49 per cent, 40·07 per cent, 35·69 per cent, as shown by the list of Mineral certificates at the Company's office.

Richard Infante, Esq., the Government Geologist of North Queensland, was called in from an early stage to inspect the mine, and certify that the ore was of the quality which the copper was contained in a true lode, or whether the indications were all to be distrusted. In his report the credit of the mine was fully established, and the value of the copper was associated as it is with veins and nests of hard red copper ore, which increase in quantity and depth, together with the well-defined wall in the south-east, indicating a true lode, and the fact that the mine is situated in the proximity of a true lode than I have yet seen here, and separate it in a marked manner from those surface indications which are the result of the weathering of a true lode, and so definitive in this district."

Captain Osborne, who had very considerable experience in mining, and was well acquainted with the Mount Perry mine, and in working the Mount Perry mine, estimated that, with a moderate expenditure of capital, he could, in twelve months, produce 90 tons of ore per week, and, taking in only 100 tons of capital, gave the following calculation of the results:—

100 tons of ore, at 18 per cent,	
would give 36 tons of copper,	
at 100 per ton, value in Sydney at	
450 per ton,	\$20 10 0

20 tons of dressed ore ready for treatment at \$4 per ton ..	£80 0 0
Deduct cost of smelting, 26 tons at \$4 per ton, 24 per ton ..	804 0 0
Deduct savings from mine to Rockingham, 60¢ per ton ..	72 0 0
Net cost freight and insurance, 26¢ per ton ..	54 0 0
	1430 0 0
Clear profit per week ..	£1000 0 0

This estimate was made when copper was \$70 per ton; it is now \$50 per ton, which

The capital could not, however, return to £25,000 of 1875, and the valuable services of Captain Osborne were transferred to the Admiralty, where he has successfully proved his judgment and ability.

This mine, therefore, comes before the public under much more favourable auspices than any of the undertakings which have been hitherto offered. It is well equipped, it has ready to be taken down, and only small quantities are required for the purpose of furnishing, and so, copper can be made in more profitable quantities than the money invested in this undertaking may be considered as a capital investment in any mining adventure.

On the 16th July, 1870, when the mine was opened, or was mined, he gave a report, of which the following is an extract:

"I may remark here that the last seven days sinking the mine was carried on by two men and myself, and resulted in the discovery of a large vein of copper, and 20 tons of copper, worth at least £130 sterling, so that the mine showed a marked improvement had taken place in the mines from the time I left charge to the resumption of operations."

TURN OF APPLICATION FOR SHARES.

THE ROSEWOOD COPPER MINING COMPANY, LIMITED, 1875.

To the Directors of the Rosewood Copper Mining Company (Limited), Lloyd's chambers, 362, George-street, Glasgow.—I hereby request you to allot me 20 shares in the above company, for which I enclose the sum of £200.

receive the same or any less number than may be allotted to me, and to execute the deed of settlement when required to do so.

THE "JOHN BULL" GOLD MINING COMPANY
(Limited)
Chambers Creek.

Capital, £21,000, in 21,000 shares of £1 each.
14,600 shares are already subscribed for, and the remaining 7400 are now offered to the public on the following terms, viz.:

For application, 10s on allotment, and the balance (if required) in calls of 2s 6d per share, at intervals of three months.

It is confidently expected that not more than 10s will ever be called up, and all shares will rank equally in division of profits.

PROVISIONAL DIRECTORS:

William Fleet, Esq., Richard Brownlow, Esq.,
W. J. Gilman, Esq., Wm. Nixon, Esq.
John Hardie, Esq. (Mason, Clerk and Mitchell).
BANKERS:
The Australian Joint Bank.
POLITICIANS:
Messrs. McEwin and Salter.
BROKERS:
Mr. John Francis, Bank-chambers, King-street.

This already well-known claim is now offered to the public in the prospectus of a new and most auspicious for the further development of its rich resources. The claim, embracing a 2-acre lease, on the Nungarry line of rail, between the station and the mine, under the same regulations, is equal to 4 acres under the present Gold-Fields Act.

It is John Allen's claim, on the same line of reef, and greater in richness as his celebrated Nungarry.

The present shaft is now at a depth of 180 feet, from which they are making a regular shipment of gold. The following is the statement of HERRALD, of the 18th instant, speaks in the following terms:

"Messrs. Nixon, Bell, and Co. have struck an exceedingly rich vein of gold in their richness to that obtained at Hawkins Hill is said to have been raised."

THE HILL FORD AND TAMBARORA TIMES, in its issue of the 17th inst. has published the following notice, and visited the John Bell (adjointing Allen's). Here I found the men busily engaged in raising first-class stone from a depth of 100 feet below the surface, and the stone at present, which is estimated to yield from 5 to 7 ounces to the ton.

The win is now widening, and the gold getting even heavier. We expect at a greater depth to get into the Alton.

These statements can also be confirmed by two of the prospectors who have been working in the area, as indicated by all persons who have visited the property. There is present at grass about 20 tons of stone, which is estimated to yield about 100 tons to the ton, and the manager reports that the stone improves as he goes down.

A large crushing plant is now being erected within half a mile of the claim, which will be at work in about two months, so that no delay will occur in realising upon the claims.

At the same time, it is not expected that any calls will be required.

It should be borne in mind that the public are not invited to join a company with a mere lease of land upon which no work has been done, and from which large bonuses are received. The only persons who are eligible for shares are those who have been in the business for some time, and it is expected that HANSMORE BENJAMIN will be payable in THREE MONTHS from the present time.

Should you desire to see the manager, or all other information obtained at the office of the broker.

The shares will be allotted as applied for.

FORM OF APPLICATION.

To Mr. John Francis,
Bank Chambers, King-street,
Ft. I hereby request that you will allot me

where in the John Bull Gold Mining Company, and
agree to accept the same or any less number that may be
allotted to me, and sign the deed of settlement when being
called upon to do so, and I herewith hand you \$
application fee of \$5 per share.
